Address: Lahore ali tawon, Lahore, 45550, Lahore, Pakistan (Work)

ABOUT ME

Passionate JavaScript developer with expertise in **Recat.js Next.js, Node.js, Express.js**, and **MongoDB, MySQL** specializing in building scalable RESTful APIs and secure authentication systems(**JWT**). Proficient in integrating third-party services like **Stripe** for payments and **Cloudinary** for media management, while following **MVC architecture** for clean and maintainable code. Certified in **Google IT Support** and **Node.js, Express.js & MongoDB Bootcamp** (Udemy). Eager to contribute to innovative projects and grow in a dynamic software development environment.

WORK EXPERIENCE

🏢 - LAHORE

BACKEND INTERNSHIP - 20/12/2024 - 15/03/2025

I worked as a Backend Development Intern at AAA Digital Company, where I enhanced my skills by working on real-world projects using advanced technologies. My responsibilities included integrating Stripe for payment processing, implementing Cloudinary for file uploads, and developing full-stack features using Next.js. This experience significantly boosted my backend development knowledge and practical understanding of modern web technologies. Also collaborated with the development team to debug issues and optimize backend performance.

🏢 - KARACHI

JUNIOR-LEVEL BACKEND DEVELOPER - 24/04/2025 - CURRENT

Currently working remotely as a Junior Backend Developer at Curious Packet, where I'm gaining practical experience with Node.js and Next.js to build and improve web applications.

PROJECTS

Complete Backend Development with Node.js, Express.js, and MongoDB

- Designed and developed a **RESTful API** using **Node.js** and **Express.js**, enabling seamless communication between the frontend and backend.
- Implemented **JWT-based authentication** and **authorization** to secure user data and ensure role-based access control.
- Utilized **MongoDB** for efficient database design, including data modeling, indexing, and query optimization.
- Integrated **Stripe** for secure payment processing, enabling users to make payments seamlessly.
- Leveraged **Cloudinary** for media upload and management, allowing users to upload and store images efficiently.
- Followed **MVC architecture** to ensure a clean, scalable, and maintainable codebase.
- Implemented **error handling** and **logging** to improve application reliability and debugging.
- Explored advanced concepts like **event-driven architecture**, **streams**, and the **Node.js event loop** for performance optimization.
